

## ***BEST POSTER PRESENTATION AWARDS***

- 1.** High-cell-density fed-batch cultivation of *Micrococcus luteus* for enhanced carotenoid production  
*Linus Aulich*
- 2.** How to produce PHB co-polymers in cyanobacteria?  
*Zuzana Šedrlová*
- 3.** Development of an aptasensor for rapid and specific detection of *Escherichia coli* in water and milk samples  
*Marisa Manzano*

## ***MARIA PIA VIOLA MAGNI BEST ORAL PRESENTATION AWARDS***

- 1.** Evaluation of Autophagy And Apoptosis Mechanisms In Viral Hepatitis And Alcoholic Cirrhosis  
*Gunnur Demircan*
- 2.** A rare Malpuech, Mignarelli, Michels, Carnevale Syndrome (3MC Syndrome); a Novel variant in the MASP1 gene  
*Onur Recep Gunduz*

&

A high-speed imaging methodology to study two-phase-flow phenomena involved in enhanced subcritical dense phase carbon dioxide pasteurization

*Ratka Hoferick*

- 3.** Molecular Genetic Diagnosis by Whole Exome Sequencing in Patients with Hereditary Platelet Disorders: Identification of ITGA10, a New Gene responsible for a congenital platelet disorder

*Durdugul Ayyildiz Emecen*

&

Gluconic acid production by *Aspergillus niger* from sugarcane molasses and grape must: effect of increased air pressure and operation mode

*Sílvia Fernandes*
